SATYABRATA MISHRA

Senior Product Manager — Data & AI Powered Platforms, Partner Ecosystems & Enterprise Cloud/Data

Bengaluru, India | mishra.satya2818@gmail.com | linkedin.com/in/satyabrata-mishra-7ba556196
medium.com/@mishra.satya2818 | blogs.oracle.com/database

PROFESSIONAL SUMMARY

Senior Product Manager with 11+ years in enterprise cloud, data platforms, and AI, including 5+ years of product management at Oracle building platform capabilities and partner programs for ISVs, GSIs, and SIs. Backed by 6 years of database consulting and migration delivery at Bosch (BICS) and Capgemini.

Owns the end-to-end product lifecycle — discovery, requirements, prioritization, launch, and adoption — for Oracle Cloud Database Services, Multicloud, and Database Migration. Owns Oracle's partner-facing Third-Party Applications certification platform and designs integration, onboarding, and enablement experiences that shorten partner time-to-value and grow partner-driven consumption, while meeting security, compliance, and resilience requirements (DR, RTO/RPO, regulatory continuity).

Currently driving Generative AI and Agentic AI for Oracle AI Database 26ai — Select AI, AI Vector Search, Oracle Machine Learning, Private Agent Factory, and Property Graph — turning AI capabilities into actionable sales use cases for partners and field teams. ISB-certified Product Manager with strengths in voice-of-customer research, usability studies, competitive intelligence, stakeholder alignment, and mentoring distributed partner teams.

CORE COMPETENCIES & TECHNICAL SKILLS

AI & Experience Platforms: Generative AI · Agentic AI (Private Agent Factory) · Select AI (NL2SQL) · AI Vector Search · Oracle Machine Learning (OML) · Property Graph · Prompt Engineering · AI-Assisted Prototyping · AI-Leveraged Market Research

Partner Ecosystem & Experience: ISV / GSI / SI Partner Programs · Partner Onboarding & Enablement · Partner Integrations & Certified Ecosystem · Co-Sell & Joint GTM · Deal Registration Growth · Field & Partner Enablement · Voice of Customer

Product Strategy & Lifecycle: Roadmap Planning · Prioritization · PRD/BRD Authoring · OKR/KPI Frameworks · Pricing & Packaging (BYOL) · ARR/NRR Growth · Product-Led Growth · Competitive Positioning · P&L / Budget Ownership · Product, Operating & Business Reviews

Cloud, Data & Trust: Oracle Autonomous Database (ADB-S, 19c–26ai) · ExaCS · BaseDB · Elastic Pools · Refreshable Clones · MySQL HeatWave · AWS RDS · OCI IaaS/PaaS · Multicloud & Hybrid Architecture · Migration Frameworks · DR Strategy · SLA/SLO (RTO/RPO)

Discovery & Delivery: User Interviews · Usability Studies · CX Assessment · Win/Loss Analysis · A/B Testing & Experimentation · Wireframing & Prototyping · Agile/Scrum · Backlog Grooming · Release Management · Stakeholder Management · Team Leadership & Mentoring

Tools: Jira · Confluence · Aha! · Productboard · Figma · Miro · Notion · Amplitude/Mixpanel · Google Analytics · Power BI · SQL · Python · Postman/REST APIs · AI Copilots (Claude, ChatGPT, Copilot, Cursor)

PROFESSIONAL EXPERIENCE

Senior Product Manager — Oracle

Bengaluru, India *Jul 2021 – Present*

Owns end-to-end inbound and outbound product management for Oracle Cloud Database Services (Autonomous Database, BaseDB, ExaCS), Multicloud, and the Database Migration portfolio, including partner-facing integration, onboarding, and enablement programs; current mandate spans Gen AI and Agentic AI on Oracle AI Database 26ai. Accountable for portfolio profitability and investment budget, and drives execution through regular Product, Operating, and Business Reviews with product and technology leadership.

AI-Powered Platform & Partner Experience

- **Third-Party Applications Certification Platform (Product Owner):** Own Oracle's partner-facing certification matrix and search experience for Autonomous AI Database (oracle.com/autonomous-database/third-party-applications), where customers discover certified BI, ETL, data catalog, and observability tools and ISV partners showcase compatibility; defined connector and integration requirements that expanded the certified ecosystem to 15+ tools and cut average partner integration time by ~35%.

- **Gen AI / Agentic AI Launch & Sales Use Cases:** Led launch and GTM for Oracle Database 26ai AI capabilities — Select AI (NL2SQL), AI Vector Search, OML, Private Agent Factory, and Property Graph — translating them into sales use cases through positioning guides, battlecards, and solution briefs adopted across 5+ field regions; contributed to a ~25% increase in AI-related deal registrations within two quarters against AWS Bedrock + Aurora, Azure AI + Cosmos DB, and GCP Gemini + AlloyDB.
- **ISV & SI Partner Ecosystem:** Partnered with Informatica to bring IDMC (Intelligent Data Management Cloud) and MDM onto Oracle Autonomous AI Database, co-defining integration architecture and joint GTM messaging that grew joint pipeline ~25%; managed strategic ISV partnerships (Finacle, Cohesity, Manhattan Associates, Sabre) and SI alliances (TCS, Infosys, Wipro).
- **Partner Enablement Program & Team Leadership:** Orchestrated 50+ partner enablement workshops and led and mentored a distributed team of partner enablement leads, driving a 20%+ increase in Autonomous Database consumption among enabled partners.
- **Multi-Tenant Platform for SaaS ISVs:** Led product strategy for Elastic Pool architecture on Oracle Autonomous Database, letting SaaS ISVs share compute and storage dynamically across tenant databases; drove a 30%+ increase in SaaS ISV adoption, cut customers' effective per-tenant consumption by ~25%, and lifted average enterprise commitment size by ~20% via consumption-based upsell.
- **Experience Research & Roadmap:** Conducted 40+ user interviews, usability studies, and AI-leveraged market research, partnering with product designers, data scientists, and UX researchers to assess customer experience and shape the roadmap for the Oracle AI Database Cloud Service Multicloud initiative; cross-functional alignment with engineering, marketing, and field sales shortened roadmap sign-off cycles by ~20%, and AI-assisted prototyping cut concept turnaround from weeks to days.

Multicloud, DBaaS & Migration Platforms

- **GSI Partner Onboarding — 90-Day Multicloud Migration Sprint:** Partnered with product marketing to design and launch a 90-day program for Global System Integrator (GSI) partners — structured onboarding, technical enablement, and milestone-based execution — onboarding 10+ GSI delivery pods and cutting average migration cycle time by ~35%.
- **AWS RDS → Oracle Migration Service:** Designed and launched a structured migration service to move enterprise workloads from AWS RDS to Oracle Autonomous Database — assessment tooling, pre-flight validation, and partner-delivered execution playbooks — driving 40+ competitive workload migrations and a measurable lift in influenced ARR against AWS.
- **Backup-Based DR for MSME (Resilience & Compliance):** Defined and brought to market a backup-based Disaster Recovery offering as a lower-cost alternative to active Data Guard, helping MSME customers meet data-protection and regulatory continuity requirements within budget; grew DR attach rate among cost-sensitive accounts by 30%+ and established a new Oracle DR product line with materially improved RTO at roughly half the cost of active-active DR.
- **SE2 BYOL Adoption Funnel:** Developed and launched a go-to-market strategy for a new Standard Edition 2 (SE2) BYOL adoption funnel, creating a low-friction upgrade path for customers holding existing SE2 licenses; grew funnel-sourced qualified pipeline 3x within two quarters and turned it into a repeatable SI co-sell motion.

Database Consultant / Migration Specialist — Robert Bosch (IoT Cloud Services)
Bengaluru, India *Jul 2017 – May 2021*

- **Migration Lead:** Owned the end-to-end lifecycle (planning, execution, post-migration validation) for Bosch IoT Cloud Services (BICS) database migrations; authored PRDs and user stories with acceptance criteria across Agile sprints in Jira/Confluence, delivering 100+ production migrations with a <2% post-migration incident rate.
- **Automation Framework:** Designed and implemented a Migration Automation Framework for Oracle-to-cloud and cross-platform workloads, cutting manual migration effort by ~40% and shrinking average migration cycle time from weeks to days.
- **Cloud Architecture:** Deployed Oracle and MySQL environments on AWS (EC2, RDS, DMS) and OCI; integrated GoldenGate for zero-downtime replication and Kafka/Hadoop for streaming pipelines, sustaining 99.9%+ uptime across production workloads.
- **Observability:** Built a Product Availability Dashboard giving real-time service-health visibility, cutting mean-time-to-detect (MTTD) by ~30%; adopted for executive stakeholder reporting.

Database Consultant - Capgemini
Bengaluru, India *Oct 2015 – Jul 2017*

- Delivered Oracle database solution design and architecture across 10+ enterprise client engagements, managing the full lifecycle (installation, patching, cloning/refresh, cross-platform migrations, upgrades) and cutting planned downtime by ~20%.
- Led ITIL escalation handling, resolving 95%+ of incidents within SLA through rapid root-cause analysis.

EDUCATION

Product Management Specialization — Indian School of Business (ISB), 2022; Hello PM
B.Tech, Electrical & Electronics Engineering — Biju Patnaik University of Technology, 2013
